Swing

A exceptional packaging falls in place

Swing

The prominent silhouette of the SWING case is responsible for his futuristic and clear character. The wavy construction on the side will take care of a good grip and a truly unique design.

SWING 3648

Dimensions outer 115 x 240 x 52 mm
Dimensions inner 110 x 220 x 48 mm

SWING is our new upright-format case series. You will have the chance to use a modern and at the same time practical case with the highest standards concerning functionality and attractivity as well as a futuristic design.

SWING can be employed in many branches, for example pharmacy and promotion, measuring-technique as well as stationery and toy-industry.

SWING is being produced from high impact tested Polypropylene and will be available in many attractive colours. You will be able to adapt the inside and outside of the case perfectly to the contents through prints as well as individual inlays made from various foams or deep-drawn inlays.

The first case from the SWING design is produced in the important DIN long format, other interesting sizes will follow shortly.

The function is easy and secure. To open the case all you have to do is push the latch upwards.

Bicycle case

NEW shine-design

Now available our bicycle case in a fresh and modern look. The blue-translucent colour grants lightness and unobtrusiveness, but the case is as secure and sturdy as before. This is simply the best place for your rain-jacket, repair-tools, the bicycle helmet or for snacks.

The tested performance of the case has been kept. The case is made of Polypropylene, is also been equipped with a lock and will be delivered including the standard fastenings. The case itself is being dispatched with a soft foam for safety and silent transport of the goods.

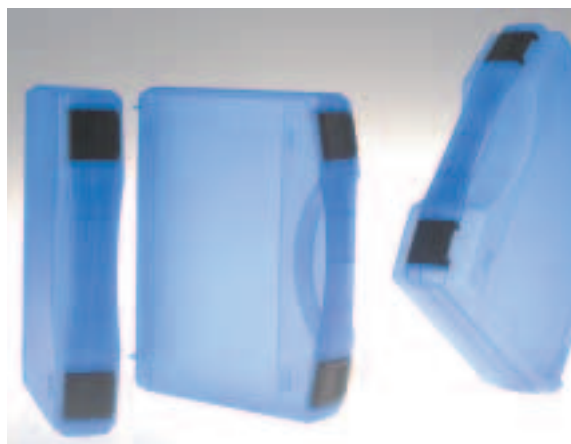

TEKNO 2003

Again we have extended our TEKNO-case series. Giving in to our customers needs, we have now TEKNO 2003 – 72 mm thick, available in two smaller versions. This is the TEKNO 2003 S (small) with a thickness of 48 mm and the TEKNO 2003M (medium) with a thickness of 60 mm.

TEKNO 2003S is therefore applicable for example for DIN A5 documents. Besides that, there a number of smaller and flat items (scissors, wrenches) which will fit perfectly in this case.

TEKNO 2003M is a combination of TEKNO 2003 (bottom) and TEKNO 2003S (lid). Very often there has to be only a profile foam in the lid. For this reason a smaller lid is just perfect, since we don't have to pack unnecessary space with even more foam.

**The little
 TEKNOs in
 small, medium
 and normal.**

TEKNO 2003
 Dimensions outer
 255 x 210 x 72 mm
 Dimensions inner
 244 x 161 x 66 mm

TEKNO 2003 M
 Dimensions outer
 255 x 210 x 60 mm
 Dimensions inner
 244 x 161 x 54 mm

TEKNO 2003 S
 Dimensions outer
 255 x 210 x 48 mm
 Dimensions inner
 244 x 161 x 42 mm

K 15

Dimensions outer
 295 x 380 x 190 mm

In own matters

Dear ladies and gentlemen,

Since November 1, 2004 we count a tool construction- and form building company our own. Due to our good experience and long-term business cooperation, this established company has been taken over from us and a new company WAG Werkzeug- und Formenbau GmbH in Brattendorf (Thüringen) has been founded. More information in this regard in our next Newsletter!

*Until then we wish you a good time,
W. AG Funktion + Design!*

The next „Funktion + Design“ will be published in December. You can already look forward to it!

► Ask for your personal sample of SWING. All you have to do is call 0049-36967-6740.

A new machine provides even more capacity

Last month our machine park has been extended with a new injection moulding machine from the brand Engel with 300 tons, including a withdrawal handling system for the case parts. A big effort for everyone involved until the machine could be installed at the designated place.

With this new machine we have extended our capacities for the case sizes TEKNO 2017, 2018, 2019 as well as SALSA 1830, 1850 and 1870 considerably. That means for you: much shorter delivery times even for bigger orders.
